EDUCATION

App Academy

Certification of Software Engineer Immersive Program

San Francisco, CA

July 2023 – August 2024

Relevant coursework: Full Stack, Software Engineering, REST API, Software Development Cycle, Data Structures and Algorithms, Scrum Methodology, Database management, OOP, Python, JavaScript, HTML, CSS, REACTJS, JSON, REST API and more.

Northern Virginia Community College

Associates Degree

Woodbridge, VA

May 2023 – Present

Completed Dual Enrolled Computer Science courses

Relevant coursework: Data Structures/Algorithms, Python, Software Design, Software Development, and Database Management.

Referred to take on App Academy's Full-Stack program.

WORK EXPERIENCE

Revent

Software Engineering Internship

Washington, DC

Nov 2023 – April 2024

- Migrated codebase from React.jsx to React.tsx, improving type safety and code maintainability
- Implementing user authentication navigation flow using React.tsx and Next.js, enhancing security and user experience for WalletWize, a finance management application
- Designed and integrated RESTful APIs to facilitate seamless data exchange between the frontend and backend leading to improved app performance
- Utilized TypeScript, React, and Tailwind and Next.js to build dynamic, responsive user interfaces
- Participated in Agile development processes, including sprint planning and daily stand-ups to ensure timely delivery of features and improvements.

PROJECTS

Regal Sartorial | Full-Stack E-commerce site

[Live Site](#) | [Github](#)

Technologies used: JavaScript | React.js | Email.js | Redux.js | CSS3 | Python | SQLAlchemy | Flask.py | PostgreSQL | AWS

- Implemented a robust authentication system to ensure secure user login.
- Developed the favorites feature, allowing users to save items and create wardrobes by grouping clothing items for inspiration.
- Engineered a secure checkout process, incorporating shipping details, payment method selection, and purchase confirmation.
- Contrived user reviews, allowing customers to leave feedback on products, improving user engagement and trust
- Incorporated an email confirmation method using Email.js, allowing users to get a confirmation email upon placing orders.

Vibr | Full-Stack Chat-Application

[Live Site](#) | [Github](#)

Technologies used: TypeScript | React.js | TailwindCSS | Zustand | Prisma | Express.js | PostgreSQL | Socket.io

- Implemented robust authentication and authorization using JWTs, integrated with React for client-side session management.
- Built real-time messaging functionality with Socket.io, ensuring instant message transmission.
- Managed online user status by integrating React Context and Zustand, providing real-time online/offline indicators.

OPEN-SOURCE CONTRIBUTIONS

[Live Site](#) | [Github](#)

Bonfire | Full-Stack Discord clone

Technologies used: JavaScript | React.js | Redux.js | CSS3 | Python | SQLAlchemy | Flask.py | PostgreSQL | Socket.io

- Collaborated with a team of 3 engineers to develop a Discord clone
- Implemented a secure authentication system to manage user registration and login, ensuring data privacy and protection.
- Constructed server functionalities, allowing users to create servers, channels, and send messages within the channel

SKILLS (Years of experience listed after each item)

Programming Languages: Python 3, JavaScript 2, TypeScript 1

Frameworks: React 2, Flask 1, Node.js, Express.js

Databases: PostgreSQL, MongoDB 0.5

ORM's: SQLAlchemy 1, Sequelize 1, Prisma 0.5

Other: Git 3, Agile, Redux.js, AWS 0.5
