(571) 516-1741 | [Email](#) | [LinkedIn](#) | [Portfolio](#)

SKILLS (Years of experience listed after each item)

Programming Languages: Python 3, JavaScript 2, TypeScript 1

Frameworks: React 2, Flask 1, Node.js, Express.js

Databases: PostgreSQL, MongoDB 0.5

ORM's: SQLAlchemy 1, Sequelize 1, Prisma 0.5

Other: Git 3, Agile, Redux.js 1, AWS 0.5

WORK EXPERIENCE

Revent

Washington, DC

Software Engineering Internship

Nov 2023 – April 2024

- Transitioned the codebase from **React.jsx** to **React.tsx**, enhancing type safety and code maintainability through component refactoring and the application of **TypeScript** interfaces, resulting in reduced runtime errors.
- Implemented user authentication navigation flow using **React.tsx** and **Next.js** for WalletWize, a finance application, integrated **OAuth** providers to enhance security and user experience.
- Designed and integrated RESTful APIs to facilitate seamless data exchange between the frontend and backend leading to improved app performance leading to a **5%** improvement in data retrieval speed.
- Utilized **Tailwind CSS** & **Ant Design** for luxury and responsive UI, ensuring consistent design across devices.
- Participated in Agile development processes, including sprint planning and daily stand-ups to ensure timely delivery of features/improvements and leading to a successful bi-weekly sprint release.

PROJECTS

Regal Sartorial | Full-Stack E-commerce site

[Live Site](#) | [Github](#)

Technologies used: JavaScript | React.js | Email.js | Redux.js | CSS3 | Python | SQLAlchemy | Flask.py | PostgreSQL | AWS

- Implemented a robust authentication system using **Bcrypt** & **CSRF**, enhancing security.
- Developed the favorites feature, allowing users to save items & create wardrobes by grouping clothing items via **Redux**.
- Engineered a secure checkout, incorporating shipping details with Autofill via the **Mapbox API** increasing checkout speed.
- Contrived user reviews with **Flask**, allowing customers to leave feedback on products, improving user engagement and trust.
- Incorporated an email confirmation method using **Email.js**, allowing users to get a confirmation email upon placing orders.

Vibr | Full-Stack Chat-Application

[Live Site](#) | [Github](#)

Technologies used: TypeScript | React.js | TailwindCSS | Zustand | Prisma | Express.js | PostgreSQL | Socket.io

- Implemented robust authentication and authorization using **JWTs**, integrated with **React** for client-side session management.
- Built real-time messaging functionality with **Socket.io**, ensuring instant message transmission.
- Managed online user status by integrating **React Context** and **Zustand**, providing real-time online/offline indicators.

Bonfire | Full-Stack Discord clone

[Live Site](#) | [Github](#)

Technologies used: JavaScript | React.js | Redux.js | CSS3 | Python | SQLAlchemy | Flask.py | PostgreSQL | Socket.io

- Collaborated with a team of **3 engineers** to develop a Discord clone
- Implemented a secure authentication system to manage user registration and login by using **JWT's** & **CSRF**.
- Constructed server functionalities, allowing users to create servers, channels by utilizing **Redux** state management
- Integrated **Socket.io** to enable real-time messaging within channels, enabling instant message delivery & user reactions for dynamic communication experience.

EDUCATION

App Academy

San Francisco, CA

Certification of Software Engineer Immersive Program

July 2023 – August 2024

Relevant coursework: Full Stack, Software Engineering, REST API, Software Development Cycle, Data Structures and Algorithms, Scrum Methodology, Database management, OOP, Python, JavaScript, HTML, CSS, REACTJS, JSON, REST API and more.

Northern Virginia Community College

Woodbridge, VA

Information Technology Associate's Degree

May 2023 – Present

Relevant coursework: Data Structures/Algorithms, Python, Software Design, Software Development, and Database Management.
